

# TRAILER STAND

A must-have to minimize front tipping accidents when loading and unloading cargo from semi-trailers

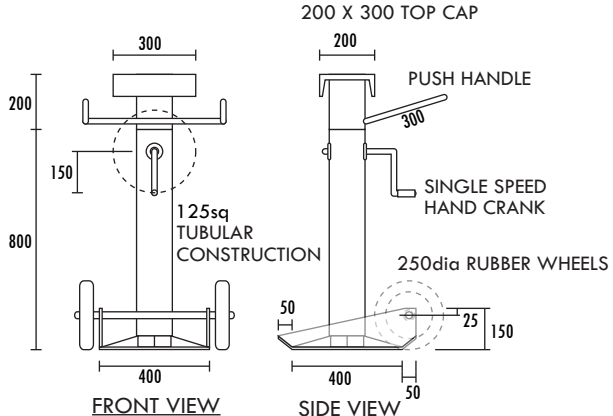

## DESCRIPTION

Trailer Stand is a safety device that provides a safe and easy-to-use support when placed underneath the front kingpin rubbing plate assembly of a semi-trailer at the loading dock.

It helps to minimise/prevent:

- Collapse of the trailer front due to the buckling of the landing gear
- Front tipping due to the shift of load centre-of-gravity (C.G.) during loading and unloading processes

## SPECIFICATION

	Model	TS30	TS40
	Static Capacity (ton)	30	40
	Est. Dead Wt (kg)	80	
	Close Ht (mm)	1000	
	Max. Extended Ht (mm)	1400
